

ABOUT US

JMG offer a complete mechanical and electrical solution for all your pipework installation needs, from off-site fabrication to on-site erection, plant installation, maintenance, testing and commissioning. JMG started life at the Glaxo Pharmaceuticals site in Hertfordshire 30 years ago, where it still continues to deliver special projects. Since then JMG has grown and now has a presence in a number of key industry sectors, as well as running the prevention and maintenance help desk at GlaxoSmithKline in Hertfordshire, where it all began.

“I have found JMG Specialised Engineering a very pro-active, helpful and flexible contractor ... I would highly recommend them to anyone without hesitation”

Sarah Moore, Project Manager, Ameresco

HEALTH & SAFETY

JMG often work in hazardous environments, something we never forget or take for granted. As a business we choose to adopt a rigorous and professional approach to all aspects of our Health & Safety. It really is the only way to keep everyone healthy and safe. JMG is justifiably proud of its record in this respect.

WORKING WITH YOU

Jonathan Granfield has a wealth of experience and will always add value to any initial enquiry. Once on-site, JMG know, through experience, that the best way to do their job is to help you do yours. On completion, JMG ensures every job is fully validated to the client's satisfaction, with all relevant documents and certification provided as part of the handover.
